User & Training Manual
Intense Pulse Light Safety Guidelines

The following information is provided for the correct utilization of IPL Skin treatment system. The information includes not only the accident protection regulations the products comply with, but also the effective regarding proper use of the products.

1) Electric safety regulation

2) Material ROHS test 2002/95/EC
Restriction of use of certain Hazardous Substance in Electrical & electronics Equipment/ROHS.

4) ISO 13485:2003 MEDICAL/33021200005459

5) ITC MEDICAL CE

Why is IPL better than other treatments? 
In addition to treating multiple symptoms and locations in each session, IPL is gentle, non-invasive and safe. Because of this, there is no "down time." You see results in the complexion and the skin texture of the entire face. You can return to your normal routines and activities immediately. In fact, many people even schedule their sessions during their lunch break. Additionally, IPL treatments are customized to your specific skin type and color, providing the best possible results.

What areas can be treated with IPL systems? 
The IPLSystem can remove hair from all parts of the body including the face, legs, arms, underarms, and back. It can also treat sensitive areas like the chest, nipples and bikini line.

What do IPL treatments feel like? 
As the name implies, the IPL hand-piece cools and soothes as it glides along your skin. When the pulse of lights delivered, some patients experience a mild pinching or stinging sensation. No local anesthesia or pain medication is typically required, however some patients may prefer to use a topical anesthetic when sensitive areas are treated.

How many treatments will I need? 
Most areas require 3-6 treatments, but the number of IPL treatments you may require for optimal long-term benefits depends on various factors such as your hair thickness, the area treated, and your hair growth rate.
Question

cycle. Interestingly, not all hairs are actively growing at the same time, but actually go through three distinct phases; growth, regression, and resting. IPL systems work by disabling the hair that is principally in the active growth phase at the time of treatment. Since other hairs will enter this active growth phase at different times, additional treatments may be necessary to disable all of the hair follicles in a given area.

How is IPL used to treat benign vascular lesions? Aging, sun exposure and other factors can cause the appearance of broken capillaries and blood vessels on the face known as telangiectasias, which appear as spider veins. Sometimes broken capillaries can cause a diffused redness in the skin, called erythema, a source of social embarrassment for many people. Rosacea is a common skin condition that is characterized by diffused erythema. All of these conditions
1. Product Information

APPLICATION
* Hair removal
* Skin rejuvenation
* Red face, red nose, couperosis, spider veins.
* Age spots, sun spots, pigmentation troubles
* Acne

FEATURES
* 1 handle
  Big handle: 15*50mm with 5 filter
  640-1200nm for hair removal
  590-1200nm for red face, red nose, couperosis, spider veins.
  560-1200nm for Skin rejuvenation
  430-1200nm for Acne optional
  480-1200nm for age spots, sun spots, pigmentation troubles optional
  750-1200nm for hair removal in Dark Skin optional
* Lamp longevity: 60000 shots
* Energy: 15-50J
* Pulse Number: 1-15 adjust
* Pulse Width: 1.0-20.0
* Pulse Delay: 1-50
* Shot period: 2-5 second adjust
* Display: 8.0 inch Touch display
* Voltage: 110V or 220V
* Power: 600W
* Cooling system: Wind + water + semiconductor
* Certifications: CE/ROHS
* Package size: 65*55*42cm + 50*37*14cm
* Weight: 35kg
* Free part: laserglasses, funnel
2. Installation Alignment and operation procedures

2.1 Open the Package and checking all parts.

2.2 Put the handle holder on machine by screw. Then connect well the handle in back of machine.

2.2 Put the water to Input, when water is out of overflow means the water tank is full.

2.3 Put the filter in handle.
3. Operate the Device

3.1 Auto interface

Skin Type: I - II White Skin    III IV Dark Skin

Pigmentation: None    Light    Medium    Intense

Hair Thickness: Thin    Medium    Thick
3. Operate the Device

3.2 Manual interface

- **TREATMENT**
  - Pulse Number: 15
  - Pulse Width: 20
  - Pulse Delay: 50
  - Release: 5
- **PARAMETER**
  - Energy: 50

3.3 Data interface

- **15*50mm**: current shot account, press it will be 0
- **Total Counter**: all shot account, need input password for 0

![Diagram](image)

15*50mm: current shot account, press it will be 0
Total counter: all shot account, need input password for 0
3. Operate the Device

3.3 Operating & setting

Choice one model language in Screen. The system will enter Auto model. In Auto model, the system have memory right parameter for many treatment. Only need choice right Skin type, Pigment, Hair thickness, then press the READY, the Machine can start to work. Manual model, User can input right parameter to fix sufferer treatment. Choice different filter to make different treatment. User Data show the current shot amount and total amount. Delete total shot amount need password.

3.4 Finish the treatment.
Frist need press the ON in screen, make the lamp off. Then turn off the key switch + urgency button + main electric switch. Do not let the lamp be light when the user leave for long time.
4. Treatment Parameter

Dark hair by lower width
Light hair by higher width
Thickness hair by higher delay and lower energy
Thin hair by lower delay and higher energy
dark skin by higher delay and lower energy
light skin by lower delay and high energy
When add the width that can not reduce the energy
when reduce the width that can not add the energy

Never shot to eyes
7. Service

7.1. Screen

Message control cable

Foot Switch NO.1 and NO.3 Pin

Connect to 12V offer the power of screen
7. Service

7.2. IPL Power Supply

A1 A2 220V or 110V AC out to 12V Powerbox.
A3 A4 220V or 110V AC in.
A5 A6 to Key Switch and Urgent Button.
A7 Message control to Screen board
A8 to CAP+, A9 to CAP-, A10 to lamp-
7. Service

7.3. Change Lamp

7.3.1. Disconnect the panel of handle

7.3.2. Take out the screw of the wire connection of lamp
(The insulating tape, protecting electricity leakage)

7.3.3. Screw off these two plastic caps.
Take care inside tubber airproof ring,
Draw out the break lamp from inside.

7.3.4. Put the new lamp inside, do not break each side cable of lamp. (Very important)
8. Our IPL Device superiority

6.2. Automatic program for treatment, the hair and skin data is from Europe and USA famous clinical.

6.3. Super cooling system for reduce pain.

6.4. It does not present any contagious risk.

6.5. Maximum security for the client, default programs

6.6. Super treatment effect
